Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/791,092	Applicant(s) TEOH ET AL.	
	Examiner Kevin T. Truong	Art Unit 3734	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 01/25/2008 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wallace et al. (U.S. 6,322,576) in view of Nita et al. (U.S. 5,951,539).

Note in figures 3B, 4B, 6, 10A, 10B, and 23A, a coil (100) having a three-dimensional secondary shape, wherein the secondary shape comprises substantially helical first section (as shown below drawing) and a second section with at least four non-overlapping loops, wherein the non-overlapping comprises a section of the coil in which the primary helical coil (100) is unwound and each loop defining a plane oriented at an angle from about thirty degrees to about one hundred fifty degrees relative to a plane defined by any immediately preceding,

wherein the loops of the second section being wound without contacting each other.

Fig. 23A

However, Wallace et al. does not disclose the helical first section (as shown above drawing) having at least 10 complete loops. Nita et al teaches in figures 2 and 2, that it is known in the art to have helical coil forming at least 10 complete loops. As a result, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the helical first section of Wallace et al having at least 10 complete loops as taught by Nita et al. in order to provide the helical coil with optimum flexibility and kink-resistance.

Response to Arguments

4. Applicant's arguments filed 01/25/2008 have been fully considered but they are not persuasive. Applicant's arguments with respect to claims 1 and 14 have been considered but are moot in view of the new ground(s) of rejection.
